# GASKETS

## ULTRA-SEAL INTAKE GASKETS

The new Ultra-Seal Silicone Bead Intake Gaskets are designed to solve seal problems with aluminum heads and intake manifolds. These gaskets are made from a new non-wicking nitrile rubber and fiber material designed to withstand 600° F temperatures. A specially formulated silicone bead is used to increase port seal and is compatible with gasoline and alcohol racing fuel.

## INTAKE GASKETS

Manufactured from Accopac, an asbestos nitrile rubber compound for excellent sealing and durability, intake gaskets are precision cut for each application. Included are rail seals and heat riser block-off plates, where applicable. Approximately 1/16" thick except where noted.

## ULTRA-SEAL EXHAUST GASKETS

Ultra-Seal Premium Exhaust Gaskets incorporate a close-mesh steel wire center core, that increases the tensile strength of the graphite impregnated facing.

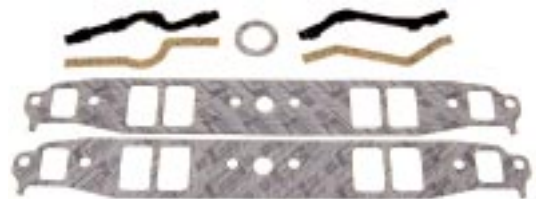

The lubricating qualities of the graphite enables the gasket to withstand intense heat and rapid expansion and contraction of headers without deteriorating. It also allows for easy removal.

## EXHAUST GASKETS

Fabricated from large-fibered asbestos and bonded by a heat-resistant, nonreverting compound, these gaskets will resist flange temperatures of 750° F.

## GASKET MATERIAL

### EXHAUST GASKET MATERIAL BULK PACKAGED

Mr. Gasket's own 1/16" thick exhaust gasket material - used for special applications.

10" x 10" Performance material	.....77
6" x 24" Performance material	.....77A
10" x 10" Ultra-Seal material	.....5960
6" x 24" Ultra-Seal material	.....5961

### INTAKE GASKET MATERIAL BULK PACKAGED

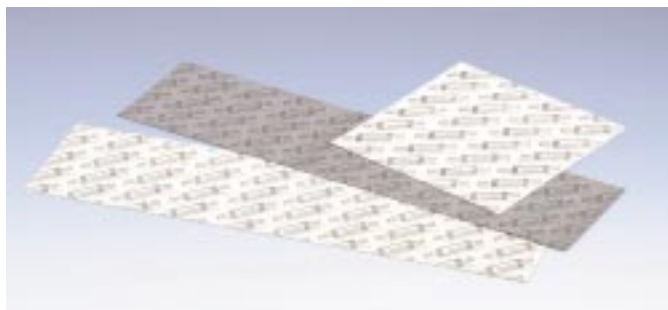

Mr. Gasket's own 1/16" thick intake gasket material - used for special applications.

12" x 12"	.....77B
6" x 24"	.....77C

### FIBER GASKET MATERIAL

Pliable and chemically treated durable fiber, this gasket material is resistant to oil, gasoline and water. Ideal for use on transmission side covers, etc.

Poly bagged.	
1/64" x 9" x 36" sheet	.....9610
1/32" x 9" x 36" sheet	.....9611
