

5" Tachometers

Drivers in various forms of motorsports utilize these Sport-Comp tachometers to achieve maximum horsepower when critical shifting is a priority. An advanced air core meter movement provides accuracy and quick response on the popular 5" Monster face. Sport-Comp tachometers include the exclusive rubber-lined shock-strap for vibration-free readings. A bright amber shift-lite signals any pre-selected rpm to notify the driver to shift.

The "Dial-In-Exactness" feature actually utilizes the tachometer's florescent red pointer to indicate the chosen rpm. By turning a set knob on the tach face, the pointer sweeps up or down until the preferred rpm is selected. The rpm can be checked at anytime by simply switching the knob to Set. Model 3906 includes peak rpm memory. The driver can switch to Recall on the tach face and the highest rpm achieved will be displayed by the pointer. This helps in setting up gear ratios and reviewing driver consistency.

Pro-Comp 5" Memory Tachs

6809 5" 9,000 RPM Tachometer (STD./ELEC.)

Operates on standard/electronic racing ignitions, such as MSD. (For Accel BEI or Laser I or II ignitions. Some may require 5215 adaptor.

6811 5" 11,000 RPM Tachometer (STD./ELEC.)

Same description as model 6809 above.

6821 5" 11,000 RPM Tachometer (VERTEX OAC)

Operates on internal coil magnetos, such as Vertex OAC and MSD Pro Mag.

6831 5" 11,000 RPM Tachometer (SUPER MAG)

Operates on external coil magnetos, such as Mallory Super Mag or Vertex OXC. (Some Super Mag applications may require model 6859.

Ultra-Lite Tachometers (In-Dash)

These 5" Pro-Comp 2 Versions are for serious racing applications. They include high peak RPM Memory recall and have a smaller 3 5/16" dia. rear case.

4494 10,000 RPM Single Range Tachometer

With Peak RPM Memory.

4499 10,000 RPM Dual Range Tachometer

With Peak RPM Memory and expanded RPM racing range.

The Official Instruments of IROC.
International Race of Champions.

6809

4494

4499

Shift-Lite

3903 10,000 RPM Shift-Lite Tachometer

Features an amber light on the control shield.

3904 10,000 RPM Shift-Lite Tachometer

Features "Dial-In-Exactness."

3905 8,000 RPM Shift-Lite Tachometer

Features "Dial-In-Exactness."

3906 10,000 RPM Shift-Lite Memory Tach.

Features "Dial-In-Exactness." has "Peak" memory which allows you to switch to Recall on the tach face & highest rpm achieved will be displayed by the pointer.
